To whom it may concern.

In 2014 we decided to work with the Instytut Gaussa and agreed on the Challenge Based Development Program (CBD™). We were interested by their approach to managerial development, which focuses on a thorough psychological diagnosis. The CBD™ program resulted in observable changes in managerial behavior and the program was definitely worth the investment. Consultants dedicated to our managers were highly competent and conducted both the diagnosis and the intervention flawlessly.

We highly recommend the Instytut Gaussa as a credible partner in the area of managerial development and organizational psychology consulting.

Sincerely yours,

Jean-Baptiste GIRAUD
